# KEY INSIGHTS FROM QUIZ FUNNEL

Only 54% of participants complete all 5 questions of the quiz;

The most challenging questions are #3 and #5 with a drop rate of 20% and 25% respectively;

Customers tend to be dubious about their own preferences - probably, they would rather prefer to be advised a shape based on their previous answers;

Questions like #5 could be too specific, as the purchase of sunglasses does not require eye exam.

```
WITH funnel AS (  
  SELECT DISTINCT q.user_id,  
    CASE  
      WHEN h.user_id IS NOT NULL  
      THEN 'True'  
      ELSE 'False'  
    END AS 'is_home_try_on',  
    CASE  
      WHEN h.number_of_pairs IS NULL  
      THEN 'Null'  
      ELSE h.number_of_pairs  
    END AS 'number_of_pairs',  
    CASE  
      WHEN p.user_id IS NOT NULL  
      THEN 'True'  
      ELSE 'False'  
    END AS 'is_purchase'  
  FROM quiz AS 'q'  
  LEFT JOIN home_try_on AS 'h'  
    ON q.user_id = h.user_id  
  LEFT JOIN purchase AS 'p'  
    ON p.user_id = q.user_id)  
SELECT *  
FROM funnel  
LIMIT 5;
```

# PURCHASE FUNNEL

| user_id                              | is_home_try_on | number_of_pairs | is_purchase |
|--------------------------------------|----------------|-----------------|-------------|
| 4e8118dc-bb3d-49bf-85fc-cca8d83232ac | True           | 3 pairs         | False       |
| 291f1cca-e507-48be-b063-002b14906468 | True           | 3 pairs         | True        |
| 75122300-0736-4087-b6d8-c0c5373a1a04 | False          | Null            | False       |
| 75bc6ebd-40cd-4e1d-a301-27ddd93b12e2 | True           | 5 pairs         | False       |
| ce965c4d-7a2b-4db6-9847-601747fa7812 | True           | 3 pairs         | True        |

```
WITH q AS (  
  SELECT '1_quiz' AS stage,  
  COUNT(DISTINCT user_id) AS 'total'  
  FROM quiz  
)  
h AS (  
  SELECT '2_home_try_on' AS stage,  
  COUNT(DISTINCT user_id) AS 'total'  
  FROM home_try_on  
)  
p AS (  
  SELECT '3_purchase' AS stage,  
  COUNT(DISTINCT user_id) AS 'total'  
  FROM purchase  
)  
SELECT *  
FROM q  
UNION ALL SELECT *  
FROM h  
UNION ALL SELECT *  
FROM p;
```

# CONVERSION RATES

| stage         | total |                               |
|---------------|-------|-------------------------------|
| 1_quiz        | 1000  |                               |
| 2_home_try_on | 750   | <div><div></div></div> 75 %   |
| 3_purchase    | 495   | <div><div></div></div> 49,5 % |

49,5% of all quiz participants make a purchase;

66% of customers who had a home trial make a purchase.

```
WITH base_table AS (  
  SELECT DISTINCT q.user_id,  
    h.user_id IS NOT NULL AS  
    'is_home_try_on',  
    h.number_of_pairs AS 'AB_variant',  
    p.user_id IS NOT NULL AS 'is_purchase'  
FROM quiz q  
LEFT JOIN home_try_on h  
  ON q.user_id = h.user_id  
LEFT JOIN purchase p  
  ON p.user_id = q.user_id  
)  
SELECT AB_variant,  
  SUM(CASE  
    WHEN is_home_try_on = 1  
    THEN 1  
    ELSE 0  
  END) 'home_trial',  
  SUM(CASE  
    WHEN is_purchase = 1  
    THEN 1  
    ELSE 0  
  END) 'purchase'  
FROM base_table  
GROUP BY AB_variant  
HAVING home_trial > 0;
```

# A/B TEST

| AB_variant | home_trial | purchase |                               |
|------------|------------|----------|-------------------------------|
| 3 pairs    | 379        | 201      | <div><div></div></div> 53 %   |
| 5 pairs    | 371        | 294      | <div><div></div></div> 79,2 % |

Delivering 5 pairs for home trial instead of 3 is a successful strategy;

Customers who got 5 pairs for home trial tend to make a purchase 1.5 times more often than those with 3 pairs.

```
SELECT style, COUNT(DISTINCT user_id) AS 'total'
FROM quiz
GROUP BY 1
ORDER BY 2 DESC
LIMIT 1;
```

```
SELECT shape, COUNT(DISTINCT user_id) AS 'total'
FROM quiz
GROUP BY 1
ORDER BY 2 DESC
LIMIT 1;
```

```
SELECT fit, COUNT(DISTINCT user_id) AS 'total'
FROM quiz
GROUP BY 1
ORDER BY 2 DESC
LIMIT 1;
```

```
SELECT color, COUNT(DISTINCT user_id) AS 'total'
FROM quiz
GROUP BY 1
ORDER BY 2 DESC
LIMIT 1;
```

# THE MOST COMMON STYLE QUIZ RESULTS

Style: Women's Style  47 %

Shape: Rectangular  40 %

Fit: Narrow  41 %

Color: Tortoise  29 %

# THE MOST COMMON PURCHASE

```
SELECT style,  
       model_name,  
       color,  
       COUNT(*) AS 'total'  
FROM purchase  
GROUP BY 2  
ORDER BY total DESC;
```

The target audience of Warby Parker is equally represented by men and women;

The most popular color is Tortoise;

The most popular female model is Eugene Narrow; the most popular male model is Dawes.

# KEY INSIGHTS FROM COMMON PURCHASE

| style | model_name    | color               |
|-------|---------------|---------------------|
| Women | Eugene Narrow | Rosewood Tortoise   |
| Men   | Dawes         | Jet Black           |
| Men   | Brady         | Sea Glass Gray      |
| Women | Lucy          | Jet Black           |
| Women | Olive         | Pearled Tortoise    |
| Men   | Monocle       | Endangered Tortoise |

# THE MOST PURCHASED COLOR AMONG MEN AND WOMEN

# PURCHASE BY PRICE GROUP

```
SELECT price, COUNT(*) AS 'total'  
FROM purchase  
GROUP BY 1  
ORDER BY 2 DESC;
```

Budget products turned out to be the least popular;

The most expensive products account for 39% of all sales.

# THE MOST EXPENSIVE MODELS

| model_name | color               | style | price |
|------------|---------------------|-------|-------|
| Dawes      | Driftwood Fade      | Men   | 150   |
| Dawes      | Jet Black           | Men   | 150   |
| Lucy       | Elderflower Crystal | Women | 150   |
| Lucy       | Jet Black           | Women | 150   |

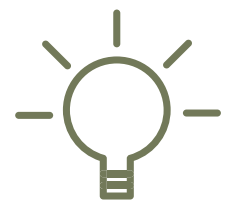

```
SELECT model_name, color, style, price
FROM purchase
WHERE price = '150'
GROUP BY 1,2,3;
```

As these 4 products account for almost 40% of total sales, it would be beneficial to make these models in the most popular color - tortoise.

# ACTIONABLE INSIGHTS

 Questions 3 and 5 of the quiz could be changed to become more general;

 2/3 of all the customers that received a home trial make a purchase, whereas almost 80% of those receiving 5 pairs to try on, buy an item - a home trial seems to be a successful strategy, especially when the choice is given among 5 models;

 As the most expensive models account for almost 40% of total sales, probably the range of models in this price category should be expanded; it could also be beneficial to produce these models in the most popular color - tortoise.

THANK YOU FOR YOUR ATTENTION!
